

MUFFLER SYSTEMS

Applegate Industrial Materials has, in a very short period of time, become the premium muffler manufacturer in the Commercial Boat industry. Our AIM Series of mufflers offer the end user a durable, economical, and efficient compact muffler that's also easy to install.

Our AIM Series is available in sizes ranging from 3 inch (inlet and outlet) up to 6 inch. Each is available with either (Style 1) Stainless Steel Weld ends, (Style 2) Stainless Steel Male Pipe Threads, or (Style 3) 150# Flanges.

What, you say these don't meet your needs? No problem; we can custom design a muffler system just for your application. Whether you prefer carbon steel, more baffles, a wetted system, larger diameters, special hangers, whatever the case, our Customer Service Representatives will be happy to work with you to design the optimum system for your application.
